Molecular Membrane Biology

Volume 12 Number 1 January–March 1995

Special Issue: Domain Organization in Biological Membranes

Contents

Welcome

Welcoming remarks at the Fogarty International Center Converence on Domain Organization in Biological Membranes, 2–4 March 1994 1

Introduction

Introductory remarks
Lev D. Bergelson 3

Papers

The cows or the fence?
V. Adrian Parsegian 5

Time and distance scales of membrane domain organization
Myer Bloom and Jenifer L. Thewalt 9

Micro-, nano- and meso-scale heterogeneity of lipid bilayers and its influence on macroscopic membrane properties
Ole G. Mouritsen and Kent Jorgensen 15

Budding, fission and domain formation in mixed lipid vesicles induced by lateral phase separation and macromolecular condensation
E. Sackmann and Toni Feder 21

Domain formation in monolayers
H. Möhwald, A. Dietrich, C. Böhm, G. Brezesinski and M. Thoma 29

Percolation properties of two-component, two-phase phospholipid bilayers
Winchill L. C. Vaz 39

Geometry of domains and domain boundaries in monolayers and bilayers
Sek Wen Hui 45

Domain formation induced by lipid-ion and lipid-peptide interactions
Joachim Seelig, Renate Lehrmann and Evelyne Terzi 51

Lipid-protein interactions and heterogeneous lipid distribution in membranes
Derek Marsh 59

Are acidic lipid domains induced by extrinsic protein binding to membranes?
Barry R. Lentz 65

Does the binding of clusters of basic residues to acidic lipids induce domain formation in membranes?
Carolyn A. Buser, Jiyun Kim, Stuart McLaughlin and Robert M. Peitzsch 69

Effect of the conformation of a peptide from gp41 on binding and domain formation in model membranes
Bernd W. Koenig, Lev D. Bergelson, Klaus Gawrisch, Jeremy Ward and James A. Ferretti 77

Role of interactions at the lipid-water interface for domain formation
Klaus Gawrisch, Judith A. Barry, Laura L. Holte, Teresa Sinnwell, Lev. D. Bergelson and James A. Ferretti 83

Cellular plasma membrane domains
Michael P. Sheetz 89

Pulmonary surfactant protein C containing lipid films at the air-water interface as a model for the surface of lung alveoli
A. Post, A. V. Nahmen, M. Schmitt, J. Ruths, H. Riegler, M. Sieber and H.-J. Galla 93

Lipid domains in sperm plasma membranes
David E. Wolf 101

A unique feature of lipid dynamics in small intestinal brush border membrane
G. Schulthess and H. Hauser 105

Cholesterol domains in biological membranes
Friedhelm Schroeder, Judith K. Woodford, Juraj Kavencansky, W. Gibson Wood and Clinton Joiner 113

Caveolae, transmembrane signalling and cellular transformation
Michael P. Lisanti, ZhaoLan Tang, Philipp E. Scherer, Eric Kübler, Anthony J. Koleske and Massimo Sargiacomo 121

Dynamic lipid heterogeneity and receptor events
Lev D. Bergelson 125

The nervous system has an absolute molecular species requirement for proper function
Norman Salem, Jr and Charles D. Niebylski 131

Transient domains induced by influenza haemagglutin during membrane fusion
Robert Blumenthal, Charles C. Pak, Yossef Raviv, Mathias Krumbiege, Lev D. Bergelson, Stephen J. Morris and R. Joel Lowy 135

Fusion of Semliki Forest virus with cholesterol-containing liposomes at low pH: a specific requirement for sphingolipids
Jan Wilschut, Jeroen Corver, José Luis Nieva, Romke Bron, Lise Moesby, Kasireddy Chandraprakash Reddy and Robert Bittman 143

The exocytotic fusion pore interface: a model of the site of neurotransmitter release
Jonathan R. Monck, Andres F. Oberhauser and Julio M. Fernandex 151

Effects of domain structure on in-plane reactions and interactions
T. E. Thompson, M. B. Sankaram, R. L. Biltonen, D. Marsh and W. L. C. Vaz 157

Calendar 163

Volume 12 Number 2 April–June 1995

Contents

Review

Evaluation of the evidence for ion channels in synaptic vesicles
Dixon J. Woodbury 165

Papers

Transmembrane helix-helix interactions and accessibility of H_2DIDs on labelled band 3, the erythrocyte anion exchange protein
Carolina Landolt-Marticorena, Joseph R. Casey and Reinhart A. F. Reithmeier 173

The use of fluoresceinphosphatidylethanolamine (FPE) as a real-time probe for peptide-membrane interactions
J. Wall, C. A. Golding, M. Van Veen and P. O'Shea 183

Topological and segmental phylogenetic analyses of the anion exchanger (band 3) family of transporters
Michael J. Espanol and Milton H. Saier, Jr 193

The surf-4 gene encodes a novel 30 kDa integral membrane protein
Julie E. Reeves and Mike Fried 201

SecA-dependence of the translocation of a large periplasmic loop in the *Escherichia coli* MalF inner membrane protein is a function of sequence context
Annika Sääf, Helena Andersson, Guro Gafvelin and Gunnar von Heijne 209

Partitioning of 1,4-benzodiazepines into natural membranes
Maria A. Perillo, Daniel A. Garcia and Augusto Arce 217

Book reviews

Cell Biology and Membrane Transport Processes. Edited by Michael Capian (W. Hong) 225

Subcellular Biochemistry, Vol. 22. Membrane Biogenesis. Edited by A. H. Maddy and J. R. Harris (G. van Meer) 226

Molecular Biology of Mitochondrial Transport Systems, Nato ASI Series, Series H: Cell Biology Vol. 83. Edited by Michael Forte and Marco Colombini (R. Benz) 227

Protein-Lipid Interactions. Edited by A. Watts (P. F. Devaux) 228

Calendar of events 231

Volume 12 Number 3 July–September 1995

Contents

Review

Membrane protein structure: the contribution and potential of novel solid state NMR approaches
Anthony Watts, Anne S. Ulrich and David A. Middleton 233

Papers

Do band 3 protein conformational changes mediate shape changes of human erythrocytes?
Jan Gimsa and Christian Ried 247

The specificity of glycolipid-preferredoxin interaction: requirements for membrane binding
R. A. Demel, M. E. de Swaaf, R. van 't Hof, D. A. Mannock, R. E. McElhaney and B. de Kruijff 255

Characterization of the intracellular GLUT-4 compartment
David Hanpeter and David E. James 263

Influence of the spectrin network on fusion of influenza virus with red blood cells
Torsten Reda, Robert Blumenthal, Peter Müller and Andreas Herrmann 271

The major integral membrane glycoprotein in adipocytes is a novel 200-kDa heterodimer
Albert Jochen, Safak Guven and Judith Hayes 277

Evidence for glucuronide (small molecule) sorting by human hepatic endoplasmic reticulum
I. D. Waddell, K. Robertson, A. Burchell, R. Hume and B. Burchell 283

Book reviews

Micells, Monolayers and Biomembranes. By M. N. Jones and D. Chapman (R. P. Rand) 289

The Lock-and-Key Principle: The State of the Art — 100 years On, Vol. 1.
Edited by Jean-Paul Behr (R. J. P. Williams) 289

Molecular and Cellular Mechanisms of Neurotransmitter Release. Edited by L. Stjärne, P. Greengard, S. E. Grillner, T. G. M. Hökfelt and D. R. Ottoson (S. Wannacott) 290

Calendar of events 293

Volume 12 Number 4 October–December 1995

Contents

Review

Protein transport via amino-terminal targeting sequences: common themes in diverse systems
Sharyn L. Rusch and Debra A. Kendall 295

Papers

The interaction between human FcγRI and the γ-chain is mediated solely via the 21 amino acid transmembrane domain of FcγRI
Patrick T. Harrison, Lise Bjørkhaug, M. J. Hutchinson and Janet M. Allen 309

Mutational analysis and molecular modelling of an amino acid sequence motif conserved in antiporters but not symporters in a transporter superfamily
Manuel F. Varela, Clare E. Sansom and Jeffrey K. Griffith 313

2 482HI XL 1562 9/97 31249-200 NJLB

Calcium-induced relocation of annexins IV and V in the human osteosarcoma cell line MG-63
J. Mohiti, A. M. Caswell and J. H. Walker 321

An investigation into the role of *N*-glycosylation in the functional expression of a recombinant heteromeric NMDA receptor
Paul L. Chazot, Miroslav Cik and F. Anne Stephenson 331

Agonist-induced displacement of quinacrine from its binding site on the nicotinic acetylcholine receptor: plausible agonist membrane partitioning mechanism
Hugo R. Arias 339

Methods

A quantitative assay to determine the amount of Signal Peptidase I in *E. coli* and the orientation of membrane vesicles
Wim van Klompenburg, Paul Whitley, Rob Diemel, Gunnar von Heijne and Ben de Kruijff 349

Book reviews

Studying Cell Adhesion. Edited by Pierre Bongbrand, Per M. Claesson and Adam S. G. Curtis (K. M. Yamada) 355

Baculovirus Expression Systems and Biopesticides. Edited by M. L. Schuler, H. A. Wood, R. R. Granados and D. A. Hammer (D. H. L. Bishop) 356

Lectins: Biomedical Perspectives. Edited by A. Pusztai and S. Bardocz (R. C. Hughes) 357

Viruses in Human Gene Therapy. By J-M. H. Vos (J. G. Dickson) 357

Temperature Adaptation of Biological Membranes. Edited by A. R. Cossins (A. Wieslander) 358
